

AX5 Door Controller with Teleporte Embedded

Powered by the Teleporte platform, the AX5 door controller transforms any electric lock into a keyless lock to provide secure, scalable, and reliable access to your critical infrastructure and assets.

The AX5 comes out of the box ready to connect to the Teleporte platform.

- ✓ Dual backup power support, full electrical isolation, and optional access pad ensure a reliable solution.
- ✓ Choose any electric lock for a door, cabinet, or other access point, and easily integrate it with Teleporte.
- ✓ With a removable cable for easy installation, the AX5 is the ideal solution for doors, cabinets, and enclosures.

The AX5 does more than open doors

The Teleporte platform is purpose-built to provide security without anonymity for critical infrastructure and assets. With bank-grade security, automated audit trails, and integrations with other business software, Teleporte is a powerful platform for providing operational insights to make better decisions.

The AX5 is compatible with the optional Access Pad accessory, which provides emergency access without a smartphone (Fail-Safe Unlock).

Integrates with Teleporte to deliver notifications on access event notifications, lock detail customization, and field notes.

Features

Fail-Safe Unlock

provides a secure method to open Sera4 padlocks during service interruptions and without the need of a mobile device

Embedded security

Access events and user identities are validated and stored reliably by AX5 door controllers, eliminating anonymity even in offline mode, or when users delete their mobile application to try to hide their identities.

Over-the-air updates

AP3 padlocks can be dynamically activated, configured, and updated in the field, simplifying and optimizing deployment and maintenance.
