Access Control & Compliance for Retail Distribution

## Secure critical assets, from factory to retail, with Teleporte

Sera4 provides secure, scalable, and reliable identity management and access control for each step of the factory to retail logistics chain. If it's critical, it can be secured with Teleporte.

Some of the world's leading companies are using Teleporte to optimize logistics and loss prevention at every stage, from transporting parts and raw materials, to warehouse delivery. Sera4's suite of Teleporte-embedded hardware and the Teleporte platform provide rich insights into every access point across the factory to retail chain, with automated audit trails and rich insights to inform decision making and optimization. **Teleporte is the most secure, scalable, and reliable solution for verifying identity, mitigating loss and theft, and gaining a complete picture of every step of your products' journey from your facilities to the consumer.**

The power of keyless

- ✓ Issue and revoke digital keys, efficiently and in real-time, through our user friendly interface.
- ✓ Check on the status of your access points, wherever they are, with integrated map view.
- ✓ Teleporte Mobile works on all smartphones, without Bluetooth or network connectivity.

- ✓ Automatically generate reliable reports on every access point and every access.
- ✓ Failsafe Unlock provides a secure method to unlock access points without a mobile device.
- ✓ High-availability service, robust firmware, and bank-grade encryption ensure your data is secure.

The Teleporte advantage

Teleporte is more than a keyless access control system. Our cloud, mobile, and embedded hardware components work seamlessly to generate the reports, audit trails, and access data you need for **comprehensive decision making about your operations.**

With over 10 patents that guarantee security from start to finish, Teleporte facilitates secure, scalable, reliable, and insightful access control for the infrastructure that's critical to your retail distribution operations.

Secure almost any access point with Teleporte padlocks and door controllers

Provide access to 3rd parties with confidence, knowing that accesses are secure and automatically audited

Issue and revoke digital keys, in real-time

Truck Door

Warehouse 1

Warehouse 2

Distribution Center

Access, anywhere, even in remote areas without network coverage

Automatically generated audit trails provide insights into each step of your processes

Optimized for end-to-end retail distribution

Teleporte is designed to provide a single cohesive view of every access action and access point, no matter how disparate.

- ✓ Unify access control across suppliers, employees, transportation contractors, and retailers.
- ✓ Automatically grant access across a whole organization with a single admin command.
- ✓ Mitigate risk of capital losses and theft and vandalism with integrated identity verification.
- ✓ Maintain compliance with title transfer requirements with automated audit trails.
